

## 20 M CIVIL FOUNDATION DRAWING

### Assumed parameters considered in in foundation design:

Allowable net safe bearing capacity (NSBC) > 10 T/m  
Ground level water : Nil  
Depth of foundation : 1.75 M  
Material > 1600kg / m

Frustum angle > 10 deg  
Density of back filling

#### Notes of foundation drawing:

1. This is a generic foundation drawing.
2. Before commencement of construction work using these designs, the owner/client/civil contractor shall carry out detailed soil investigation of every site. further, the soil investigation report shall be reviewed by a consultant and certification shall be obtained to ensure conformity between assumed parameters and soils report values before start construction.
3. The foundation design is applicable only when the assumed SBC is available at (or) within the 1.75m depth from E.G.L.
4. In the case of required SBC is not available at/ beyond 1.75m depth, this foundation design does not stand applicable.
5. This foundation design shall not be used in case of organic silt, organic clay or peat layers are found upto depth "2b" from founding level during soil investigation (where b=pad/raft width).
6. This foundation design shall not be adopted at sites where soil is subjected to ground improvement / liquefaction. in this case special foundation shall be done.
7. In case ground water table is not found within the foundation depth. This foundation design not stand applicable.
